

Angle-on-Angle Cellar Doors

Note:
Do NOT measure the existing door

Use the illustrations above as a guide to assist you while you take the required measurements below.

Occasionally, you need an Angle Door on an Angled foundation.

Please measure the actual foundation since any old doors will be removed and the new door will mount directly to the foundation and house wall. In addition, it is important to measure in a variety of places in the event that the foundation has cracked and/or shifted.
